Summary

I'm **Shubham (JVKE)**, a **Full Stack Developer** who works with the **MERN stack, TypeScript and Next.js**. I build responsive web apps and simple APIs using **React, Node, Express and MongoDB**. I enjoy learning new things, writing clean code and turning ideas into working projects. I'm a **fresher** and I'm excited to grow, work with a team and gain real experience.

Skills

Frontend:

HTML5 · CSS3 · JavaScript (ES6+) · TypeScript · React.js · Next.js · Tailwind CSS · Bootstrap 5 · GSAP · Framer Motion

Backend:

Node.js · Express.js · REST APIs

Database:

MongoDB · MySQL

Tools & Platforms:

Git · GitHub · Postman · Vercel · Python (Basics)

Projects

CapitalShop, (E-commerce project - MERN Stack)

- **User Authentication:** Secure login and registration using JWT tokens.
- **Product Management:** Admin can add, edit, delete products and manage inventory.
- **Cart & Checkout:** Users can add products to cart, adjust quantities, and place orders.
- **Image Uploads:** Integrated with Cloudinary for optimized image hosting.
- **API Integration:** Backend REST APIs built with Express and MongoDB.

Leaderboard App, (Points Claiming Dashboard – MERN Stack)

- **User Registration:** Simple and secure form to add new users.
- **Claim Points Functionality:** Users can claim points daily via a “Claim” button, which updates their score in the database.
- **Leaderboard:** Dynamic leaderboard that displays all users ranked by points in real-time.
- **Claim History:** Each user has a claim history table showing previously claimed points with timestamps.

Education

Bachelor of Computer Applications (BCA):

Currently Pursuing (2025 – Present)
